Streamline meal pickup with Grubhub and Apex smart lockers

How your campus benefits

Fast, contactless pickup to make everyone happy
The smart locker opens with a unique code, minimizing touching and handling. It's the no-wait experience guests have been waiting for.

Streamlined order loading to make your team's life a little easier
Load orders from the kitchen directly to the locker to save steps and time for employees. Plus, an easy-to-use scanner makes training your team simple.

Improved delivery experience for you and your students
Choose designated delivery locations near popular points on campus.

Seamless integration to keep you up and running
Apex smart lockers are integrated into the Grubhub system, so you can get set up fast without additional work.

How it works
1) Students place their order on the Grubhub app they know and love
2) Restaurant employees load the food order into the smart locker via unique QR code
3) Students scan unique QR to unlock locker and pick up food
